PERSONAL PROJECT

Traffic Congestion Analysis

- This project focuses on analyzing traffic congestion data to identify patterns, peak times, and congestion-prone locations using Excel. By utilizing pivot tables and charts, we can draw insights from traffic data to support decision-making and policy planning.

Amazon Prime Analysis

- Through this Amazon Prime data analysis project using MySQL, we've gained significant insights into user preferences, peak viewing times, and engagement patterns. By analyzing data on genres, titles, viewing times, demographics, and ratings, we can draw conclusions that support strategic decision-making and customer experience improvements.
